

DAS8

DAS8 is an all-in-one, JDE-centric reporting and business intelligence solution that boasts the entire spectrum of report building and distribution capabilities. DAS8 is the premier platform by which all JDE solutions are measured. DAS8 features ProReports to bring an added level of sophistication to all types for stunning enterprise-level report outputs.

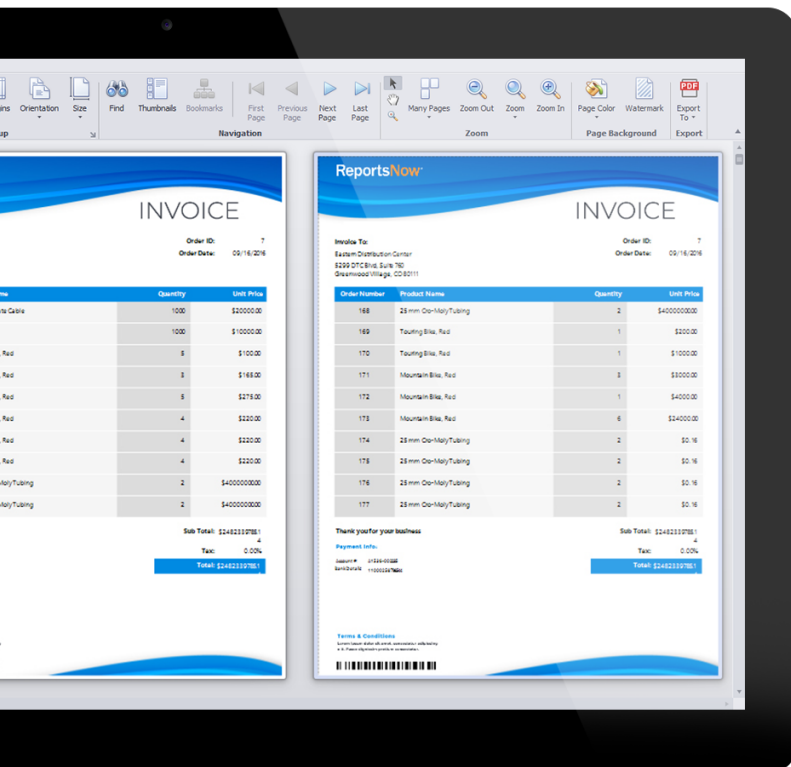

Innately Intuitive

- Easy to learn and use, yet all the power needed by IT
- Centralized queries, report design, and scheduling
- Dozens of advanced calculations available with simple point-and-click
- Embed Excel in any report while remaining SOX compliant
- Inherited JDE security with formatting and visual assists
- Interactive dashboards without cubes

Unmatched Data Access

- Query and report against any JDE or non-JDE data (Excel, SQL, Access, Oracle, DB2, cloud apps)
- Slice and dice data from any source onto a single report or in a fully interactive mobile dashboard
- Completely automate report distribution (email, bursting, network folders, mail merge, the web)
- A ProReports tool that produces stunning printable outputs
- Reports for real-time consumption; dashboards for mobile access
- Embed dashboards into E1 pages and E1 apps

The Complete Reporting and BI Spectrum

DAS8 combines industry-best ease-of-use and sophistication to offer the full spectrum of report development. Our users are both business analysts and IT professionals who create real-time reports and superb, interactive, mobile dashboards in minutes.

- ProReports: Merge rich text and visualizations on an uncomplicated design surface for vivid printouts.
- Formula Calculations: Create complex logic by combining multiple functions into a single calculation for fast and efficient reporting.
- Hyperlinks in Grids: Add dynamic hyperlinks to reports for customizable data drilldowns resulting in maneuverability between platforms.
- Integration: Visualize 100% of your data into one location by compiling information from multiple data systems for integration between applications.
